Summary

Data Scientist with 2.3 years of experience spanning Data Science, Data Analytics, and Software Engineering. Specialized in predictive modeling and designing scalable, production-ready ML and GenAI systems using cloud services and modern ML frameworks. Seeking data scientist, AI engineer, or data engineering roles within product-focused technology organizations.

Education

Mukesh Patel School of Technology Management and Engineering, NMIMS August 2024 – May 2026
(M.Tech) Master of Technology in Data Science and Business Analytics Mumbai, Maharashtra GPA: 9.2/10

Thakur College of Engineering and Technology August 2018 – July 2022
(B.E) Bachelor of Engineering in Civil Mumbai, Maharashtra GPA: 9.2/10

Experience

LTM (LTIMindtree) February 2026 – April 2026
GenAI Intern Bangalore, Karnataka

- Benchmarked LangGraph based multi-agent GenAI system with **3** specialized agents for automating from **5K+** Italian language invoices, achieving **100%** recall of extraction non compliance fields and metadata. Pipelined voting mechanism for parallel execution, reducing latency by **50%** and streamlined json output on company portal dashboard.

Pando Data July 2025 – November 2025
Data Scientist Intern Amsterdam, Netherlands

- Built and deployed a computer vision detection and tracking pipeline using Roboflow, achieving **98%** object detection accuracy and enabling reliable real-time tracking of machines and personnel to compute production throughput.
- Designed a production analytics dashboard, translating vision based tracking data into **5+** real-time KPIs.

ITJOBXS November 2024 – January 2025
Software Engineer Intern Mumbai, Maharashtra

- Programmed **40%** of backend logic for a data-driven Python application, improving efficiency and system performance.
- Resolved Google reCAPTCHA integration issues, reducing invalid submissions by **30%**, strengthening authentication.

Alu Glass System December 2022 – April 2024
Data Analyst Mumbai, Maharashtra

- Assisted in enhancing data processing, achieving **40% to 50%** increase in efficiency and cutting report generation time.
- Identified task allocation bottlenecks at sites, improving efficiency by approximately **80%** through corrective measures.
- Demonstrated leadership by managing a team of **20+** workers, optimizing task distribution to ensure timely execution.

Projects

YouTube AI Agent | Amazon Redshift, Google Cloud Console, Database August 2025
Developed a chat-enabled AI agent for contextual Q&A over video transcripts, metadata, and watch-history, improving answer relevance by **35%** and reducing hallucinations by **40%** using hybrid retrieval and prompt optimization. Built an ETL pipeline ingesting **10+** APIs, structuring unstructured data, and storing **1M+** records with **60%** faster query latency. Integrated a Bloom Filter layer to cut redundant queries by **30%**, improving overall system throughput.

Brain CT Scan Image Denoising | Image Processing, Auto-Encoder, AWS EC2 | [Live Demo](#) September 2024
Engineered a **4-layer** encoder-decoder architecture to reduce Poisson and Periodic noise while preserving diagnostic feature enhancing the scan classification accuracy about **87%** post-denoising, validating model performance. Deployed on EC2 instance, real-time processing with less than **5s** latency for single and batch DICOM image.

ETL Stock Data Pipeline Forecasting Finance | SARIMAX, S3 Bucket, Airflow | [Live Demo](#) October 2023
Automated Gold (XAUUSD) pipeline Alpha Vantage, orchestrated DAGs, **7 years** records through S3 Bucket. Migrated Prophet model to SARIMAX and reducing MAPE by **14.16%**. Integrated Amazon Redshift for analytics, enabling same-day insights and boosting query efficiency by **30%**.

Technical Skills

Languages: Python, Java, C++, Object-Oriented Programming, SQL, Data Structure & Algorithm, System Design
MLops Tools: AWS Services, Pinecone, Docker, Kubernetes, CI/CD, MLflow, DVC, Git, Snowflake, Airflow, LangGraph
GenAI: LLMs, RAG, Prompt Engineering, Fine-tuning, Transformers, BERT, Attention Models, RNN, LSTM, Agentic AI
Technology & Frameworks: LangChain, API, Neo4j, Data Cleaning & Visualization, Keras, SciPy, PyTorch, Tensorflow
AI/ML: Hypothesis A/B Testing, Statistics, Clustering, Unsupervised, Deep Learning, NLP, CNN, Time Series, Regression

Achievements / Extracurricular

- Selected — Amazon ML Summer School Trainee Program 2025, chosen among 3,000+ applicants across India
- Kaggle Discussion Expert (2x) — ranked in the top 20% across 40+ competitions, and won a Kaggle competition.
- Published Author — 4 peer-reviewed research papers in international journals, including IEEE, IJNRB, and IJARESM
- Certified — Google Advanced Data Analytics, IBM Advanced Data Science & AI, AWS Certified Cloud Practitioner
- Delivered — 2 GenAI-based freelance projects via Upwork for international clients from Bangladesh and Singapore
